

Bioscience CAT - Technology Access Program
Reporting Requirement - To be done at 1 year and at 2 years after work.

To be entered by CAT

Title of Project:

Date of TAP Award:

1) Were the core facility results and data instrumental in the development of any new products/technologies or process improvements? **[Yes or No or Too early to tell]**

2) If yes, please estimate the potential dollar value of products or process improvements? If possible, break the dollar value into economic impact already realized in the reporting period versus expected over a period of time. Note: We are not seeking firm or public statements. All numbers are considered very rough estimates that may change dramatically in the future. These numbers will not be shared publicly without prior consent. **[E.G. \$7,500 in sales of new product already plus \$50,000 in sales expected in the next 2 years].**

3) Were there any jobs created, filled and /or retained in Delaware because of this funding (these could be technical, sales, administrative, etc. positions at your company)? If yes, please provide the number of full-time equivalents (FTEs) and fractions of positions ok to report. As above, these numbers are only estimates. **[E.G. 2.5 jobs].**
